Final sanction and related disbursement depends upon the detailed appraisal of loan requests received from concerned States.

Power generation plants stuck due to fuel scarcity

1609. SHRI TARIQ ANWAR: Will the Minister of POWER be pleased to state:

(a) whether it is a fact that different plants for generation of about 7000 MW power are stuck due to fuel scarcity;

(b) if so, the details thereof;

(c) whether it is also a fact that the Central Electricity Authority has been asked to switch over to thermal power generation; and

(d) which are the proposed site for thermal power generation and how much time it will take?

THE MINISTER OF POWER (SHRI P.M. SAYEED): (a) and (b) No power station in the country has closed down due to shortage of fuel. In October, 2005, no generation loss has been reported by any coal based power station due to coal shortage. Gas based power stations of about 3920 MW capacity in the country have, however, reported decreased generation due to shortage of gas during the same period as per details given in Statement I (*See* below).

(c) and (d) Due to uncertain availability of natural gas for power generation, Ministry of Power has requested CEA to identify projects mostly based on coal. Accordingly, CEA has identified new coal based thermal power projects totaling to 40,000 MW for commissioning in 11th Plan subject to tie up of various inputs/clearances. A list of such projects giving the likely year of benefit is enclosed at Statement-II.

Statement-I

Gas based power stations reporting decreased generation in the month of October, 2005 due to gas shortage

(As reported to CEA)
